

# JOSEPH KELLER

SOFTWARE DEVELOPMENT | JOSEPHKELLER.ME  
[HTTPS://GITHUB.COM/AMERICANWONTON](https://github.com/AmericanWonton)

## OBJECTIVE

---

To provide the best project with my skillset and deliver options the best project my team has to offer.

## SKILLS

---

- Database Expertise- MongoDB, MSSQL, Oracle SQL
- Fluent in: Golang, Shell-Scripting, HTML-CSS, and Javascript
- Back-End Management: Grafana, Kibana, Dynatrace Production
- Deploying/maintaining cloud infrastructures, (mainly AWS and EKS Kubernetes).

## EXPERIENCE

---

### SOFTWARE PRODUCTION DEVELOPER • CENTENE • 5/02/19 – 2/02/2021

Researched with Developers, Scrum Teams, and SRE members to develop features in mobile/web API's, as well as alert SRE teams to potential issues within various ETL processes, Load-Balanced servers, and TruCare Production environment.

### CLOUD DEVELOPER • AT&T • 2021 – PRESENT

Worked with CI-CD/SRE teams to help develop code pipelines and develop a Network Cloud for AT&T. Delivered test-suites and pipelines utilizing Jenkins/Groovy deployed to Kubernetes cloud environments.

## CURRENT PROJECTS

---

### THE-INFORMER(ALPHA-DEVELOPMENT) • 11/15/20 • PRESENT

A project made with Kubernetes deployed Microservices in AWS. Utilizes text message APIs as a platform for charity organizations and campaigns to reach constituents and combat misinformation online.

### MESSAGEBOARD\_MICROSERVICE • 01/02/21 • PRESENT

A series of API/Independent apps restlessly waiting to respond; deployed with Docker containers deployed on AWS EC2 instances. See Resume site for link to project.
